organic hydroxy compound metabolic process terpenoid metabolic process small molecule catabolic process lipid catabolic process hormone metabolic process cellular response to xenobiotic stimulus establishment of protein localization to endoplasmic reticulum response to cAMP nuclear-transcribed mRNA catabolic process, nonsense-mediated decay SRP-dependent cotranslational protein targeting to membrane response to glucocorticoid regulation of humoral immune response p.adjust regulation of protein processingprotein processing regulation of protein activation cascade -regulation of complement activation 0.002 regulation of acute inflammatory response protein activation cascade 0.004 acute inflammatory response 0.006 complement activation cytolysis 0.008 humoral immune response antimicrobial humoral immune response mediated by antimicrobial peptide size killing of cells of other organism 10 extracellular structure organization disruption of cells of other organism

plasma lipoprotein particle assembly positive regulation of triglyceride lipase activity

protein-lipid complex assembly regulation of lipoprotein lipase activity

drug catabolic process

response to xenobiotic stimulus

-negative regulation of lipid localization

-sterol homeostasis positive regulation of lipoprotein lipase activity

> cholesterol homeostasis lipid localization

> > organic anion transport

regulation of digestive system process regulation of lipid localization

digestive system process

platelet degranulation

3'-phosphoadenosine 5'-phosphosulfate metabolic process

purine ribonucleoside bisphosphate metabolic process

carboxylic acid transmembrane transport sulfur compound metabolic process

ethanol metabolic process

fatty acid derivative metabolic process

glycerol metabolic process

blood circulation
